Irma and Viking Teams Stage Rattling Good Hockey Game

(From the Viking News)

The hockey season was opened with a "bang" in Viking on Monday night, when the Viking "Red Shirts" defeated Irma Buckaroos to the tune of 3 to 1.

Archie MacEachern opened the game by two rapid-fire goals in the first 14 minutes of play. This period was marred by Lawson of Irma getting a bad cut over the eye. Viking had a 2 to 0 lead when the period ended.

The second period ended with a fast brand of hockey and Irma scored their lone tally by a beautiful goal by the Maguire brothers after fifteen minutes of torrid hockey. This period was also stopped for a time when the Viking goalie was struck by a puck that cut a bad gash in his head. Laurie Rasmussen took his place in the net.

Midseason form was shown by both teams in the third period. Seventeen minutes elapsed before Ronnie McLaren of the Red Shirts scored the smartest goal of the night on a pass from V. Slavik, putting his team mates ahead 3 to 1 in a well-earned victory.

Due to other attractions the crowd wasn't as large as expected, but the team is hoping for more support on Friday night of this week, when the fast-skating Innisfree (Igers from the north line) will be here. Quite a number of Irma rosters were on hand to see their Buckaroos take it on the chin. Mr. Meakin acted as referee and had the boys under his thumb, although a few frayed tempers showed up.

The line-ups:

Viking
D. Sparrow, L. Rasmussen, goal.
J. McAthey, T. Murdoch, V. Slavik, defence.
A. Hardy, R. McLaren, E. Hardy, forwards.
C. Ash, A. MacEachern, L. Slavik, forwards.
B. Ash, H. Kelly, M. Runyon, subs.

Irma
R. Yeoman, B. Maguire, goal.
G. Fisher, J. Crocker, M. Knudson, defence.
Swelin, Morrison, Lawson, forwards.
Martin, Maguire, Maguire, forwards.
Monday, Smallwood, subs.

1st period—Viking (1) A. MacEachern (M. Runyon); (2) A. MacEachern (solo). Penalties—Morrison, Crocker.

2nd period—Irma (1) F. Maguire

Death of Mrs. McCreadie

Death has again visited our community and taken a beloved and dear wife, mother and friend, in the passing of the late Mrs. Margaret McCreadie.

It came as a shock to the family and friends as she had been recuperating and feeling much better than when she went out to the Mannville hospital the week previous. On Saturday morning, November 30th, she was feeling very well having had a good night and seemed her usual happy self. However, at nine o'clock A.M., she had a bad turn and passed peacefully to that Great Beyond within a few minutes.

The late Mrs. McCreadie was born at Kirkcubright, Keweenaw, Scotland, and was 73 years, and 4 months and 18 days old at the time of her death.

She lived in Scotland until the year 1914 when with her husband, two sons, Murray and James, and daughter Elizabeth, she came to Alberta and has since made her home in the vicinity where Mr. McCreadie now resides.

She was a devoted wife and mother and a friend and neighbor to all who knew her. A member of Harmony local club since its organization and thoughts of her will bring many pleasant memories to those who knew her best.

She leaves to mourn, her loving and devoted husband, two sons and three daughters, Murray and James, of Edmonton, Mrs. E. Prior, of Irma, Mrs. Susan Johnson and Mrs. Agnes Walker of Scotland, also 18 grandchildren, ten of whom are in Scotland, and eight in Alberta, and a large circle of friends and neighbors whose deepest sympathy goes out to the bereaved ones in their hour of sorrow.

On Tuesday, December 3rd, the funeral was held from the Irma United church, the Rev. Mr. Kemp officiating. He took for his text, Hebrews Chap. 11, and 9, "Dwelling in tents, He looked for a city." The hymns sung were, Abide With Me; Rock of Ages; Nearer My God to Thee, Mrs. McCreadie.

of the afternoon arrived when little Lenella Ramsay and Arthur Hay, attired as bride and groom, presented the guest of honor with a large collection of useful and beautiful gifts. Miss Ramsay in a few well chosen words thanked those assembled, after which all united in singing "For She's a Jolly Good Fellow."

After enjoying a beautiful lunch, the ladies left for their respective homes hoping that the weather will continue "showery" at Albert.

Wedding Bells

PETTIGREW-FIGUR.

A pretty wedding took place at the local Lutheran church, Mannville, on Sunday, December 1st, when Glenn Pettigrew of the Roseberry district, and Elena Figur of Minburn, (formerly of Irma) were united in marriage.

The bride wore a dress of shimmering white satin, and the groom was dressed in dark blue. The best man was Julius Kufeldt and the bride's maid was Bertha Figur, sister of the bride.

There were also two flower girls, Emma Figur, age 7, also a sister of the bride, and Hildagard Kufeldt, age 5, sister to the best man. The ceremony was performed by the Rev. Mr. H. L. Hennig, Lutheran pastor of Vegreville.

After the ceremony the guests gathered at the home of the bride's parents, Mr. and Mrs. E. Figur, of Minburn, where the bride received many beautiful gifts.

The guests were entertained till midnight, and when they departed, they expressed themselves as having had a pleasant time and wished the young couple a long and happy married life.

They're wed at last, they were pronounced
As being man and wife,
Let us all join in wishing them,
A long and happy life.

OLDHAM-JOHNSON.

The home of Mr. and Mrs. Charles Johnson of Fabyan, was the scene of a pretty wedding on Saturday, November 30th, when their only daughter Mildred Elizabeth, was united in marriage to Mr. Seth Lyman, younger son of Mr. and Mrs. Ben Oldham of Irma, the marriage ceremony was performed by Rev. Mr. E. F. Kemp, of Irma.

The bride who entered on the arm of her father was prettily attired in rose crepe. She was attended by Miss Doris Johnson, who wore a dress of yellow crepe. The groom was supported by Mr. Earl Carrington.

Following the ceremony a sumptuous dinner was served to a small number of relatives and friends. The table was adorned with a handsome three tier wedding cake.

Mr. and Mrs. Oldham left for a short honeymoon in Edmonton, and upon their return will reside in the Roseberry district.

MARSHALL-STRACHAN.

At the United church manse on Thursday, November 28th, Miss Lucy Strachan and Mr. Stanley Marshall were united in marriage. The ceremony was performed by Rev. Mr. E. F. Kemp, in the presence of Miss Alice Flewelling and Mrs. M. G. Kemp, who signed the register as witnesses.

Moths will not remain long in rugs that are sponged frequently with hot water to which a little turpentine has been added. It also brightens the colors in the rugs.

UNITED CHURCH NOTES

At the meeting of the Trail Rangers Group held on Tuesday evening, "Bob" Charter was elected as member to the sixteenth Tuxis Parliament of Alberta. The session will be held during Friday, Saturday, Sunday and Monday, December 27th to 30th, in the city of Edmonton. Art Knudson and Bob Simmerman were appointed as a committee to consider ways and means of raising the necessary funds to pay the expenses.

The Sunday school executive are planning a Christmas "treat" for the school on Friday, December 27th. The programme will include a sleigh-ride (weather conditions being favorable) a festive lunch in the church basement, and the singing of Christmas carols.

The nature and the function of money is frequently discussed these days and various views are expressed thereon. The following extract from the writings of Dr. Richard Roberts, moderator of the United church, certainly reveals the "Christian viewpoint" regarding the "possibilities" of the use of money, in its effect on human life. "Money may become the symbol and vehicle of much more than economic value. It may carry with it much that may be in the heart of man. It may be tainted by his meanness, or it may be glorified by his magnanimity. It may be a means of sin or a means of grace. It may be turned into a currency of corruption or into a currency of love. It may go to damn a soul; no less it may go to save a soul. It may be used to hurt or it may be used to heal. It may be given as a bribe; it may be offered as an atonement. It may be hoarded; it may be wasted; or it may be dedicated to God. A man's use of money becomes a clue to what is in his soul. That is why the Recording Angel may be keeping an eye on our accounts. There is only one reference in the Gospels to Jesus making personal use of money, and it is significant that on that occasion He shared it with another. "Take that" (the money) He said, "and give unto them for Me and thee."

Difficult Problems

The problems which it may be expected will be discussed at the pending conference between representatives of the Federal government and premiers of the Canadian provinces will furnish plenty of material for conversations and negotiations.

If only one half of the difficulties which the western provinces have recently experienced and still are experiencing in finding sufficient revenue to maintain their ordinary services, to saying nothing of contributing substantially towards the cost of relief, can be removed a forward step will have been taken, and representatives of the provinces will leave Ottawa with something a little more tangible than hope for speedy recovery and for future progress.

One of the factors in the present situation that will have to be faced squarely is the fact that the cost of government is pressing heavily on the taxpayers, that there is just so much money available for the upkeep of services and that a shifting of burdens from one unit to another is not the way out of the trouble, though it may be a temporary palliative.

If several buckets are dipping water out of a well which is not being replenished from natural sources it is only a question of time when the well will run dry, and in the long run it does not make very much difference which of the buckets took most of the water out of the well.

That is actually the position of the taxpayer in western Canada. There are three buckets drawing on his resources, the federal, the provincial and the municipal, the last-mentioned, of course, including the schools.

The permanent solution of the difficulty lies not so much in a decision as to who is to be allowed to draw the most, or the least, water from the well but how the well is to be replenished, and until this can be determined, those in authority will have to address themselves to the task of finding ways and means of conserving the presently available supply and making the utmost of it.

There are many ways in which a conservation policy might be put into effect and one of the most practicable would be to eliminate a good deal of duplication and overlapping of services which have grown up, apparently without any blame attachable to any one in particular for the situation.

There are, for example, services which are being provided by both federal and provincial governments resulting in double costs for machinery and operation, in addition to a degree of confusion and ineffectiveness attendant upon two unrelated organizations trying to reach the same good by different roads.

In this category might be included debt adjustment machinery and to some extent agricultural services rendered by both federal and provincial administrations. These are only cited as illustrations of a number of fields of endeavor in which co-ordination of effort by a merger of duplicated services would not only bring about greater efficiency but would also save considerable expense to the taxpayers.

It is true that in connection with these and other activities in the same category objection might be raised that dual services are essential because of the limitations of legislative competence, but if that is the sole barrier in the way of economy, then necessary legislative authority to dissipate the difficulty should be sought and doubtless could be secured if a spirit of true co-operation on the part of all concerned is evidenced.

In the matter of sources of revenue also there is duplication which should be eliminated by a better defined allocation of spheres of taxation as between the several governing units. There should not, for instance, be two income taxes with two sets of costly machinery to gather the same type of tax from the same taxpayers, necessitating a double expenditure.

In pre-war and post-war years the fields of taxation were fairly well defined and understood and governments, in those days, expended revenue collection efforts within well defined channels. First departures from recognized practice and prerogative came with the emergency demands of the war and subsequently, as financial and economic stringency became more severe, governments were loath to abandon what they had gained.

On the contrary, the practice of encroaching on one another's sources of income assumed serious proportions as the level of the water in the well declined and the demand for more and more water grew with greater intensity.

With this situation confronting them, the participants in the conference will face a difficult task. While, no doubt, many suggested methods for replenishing depleted incomes will be offered, first thought probably will be given to conservation of the existing resources, and one of the most practicable means of doing this will be to stretch the tax dollar by eliminating duplication. This can be done, not only without impairing the services involved but should result in improving them and at a lesser cost.

Are You Rundown, Tired?

Mrs. Mabel Murphy of 11 Westinghouse Ave., Apt. 2, Hamilton, Ont., said: "About five years ago I was in a state of rundown, had indigestion, could not eat, lost strength, and my weight fell off 20 pounds. Before Favorite Prescription I felt much better, had more strength and better digestion. New size, tablets 30 cents, liquid \$1.00. Large size, tablets or liquid, \$2.25."

Cannot Get Italian Marble

League of Nations' sanctions against Italy have created an unusual situation in connection with the new League palace which was scheduled to be occupied in November. Most of the Rose marble used in construction of the palace comes from Italy, and much of it is still due to arrive. League sanctions prohibit the reception of goods under existing contract, so the League must look for its marble elsewhere.

Finds Blindness No Handicap

War Veteran Has Developed Memory To Remarkable Extent

Captain Gerald Lowry, a blinded veteran of the World War, recently was one of the champion players at the British Bridge League Congress at Harrogate, England. His partner was a woman. Not only did they win but they were always the first pair to finish their hands.

Blindness has its compensations. Nature to some extent redresses the balance by developing other faculties. Captain Lowry is a remarkable example of overcoming the handicap and lives a more active and normal life than most people. He has developed his memory to such an extent that when a friend whispers the designations of his cards to him he remembers them throughout the game and where he has arranged them. When he has to play dummy, the cards are named to him and he remembers them, too. The rest is easy. During the Harrogate tournament he played 32 calls and never forgot a card.

Captain Lowry before the war was an ardent golfer and amateur boxer. He still plays golf and drives by instinct. His caddy tells him where his ball lies and where he should hit it, and he never misses. He also learned estopment and has built up one of the most lucrative practices in London. — St. Thomas Times-Journal.

Began In Ice Age

Scientists Believe Recent 'Quake' Originated 25,000 Years Ago

Persons whose sleep was interrupted by the recent earthquake may blame it on the great Ice Age.

It is at least 25,000 years since the Ice Age ended, scientists estimate, but it was these same scientists who fixed its guilt.

Dr. L. C. Conant, director of the Cornell University geological department, explained the general theory of earthquakes in the northeast is the earth is gradually recovering from the burden of a sheet of ice one to two miles thick.

"The melting of this tremendous glacier," he said, "took a tremendous pressure off the earth's crust. Every once in a while the earth stretches back a bit, moving just a trifle upward and northward. As a matter of fact, our instruments indicated there was a slight tilt to the north."

1935 Tobacco Crop

Valued At \$8,000,000

Flue-Cured Tobacco Industry In Ontario Run On Scientific Lines

It looks as if the \$8,000,000 valuation put upon the Ontario flue-cured tobacco crop by the experts will be exceeded by the value of the actual purchasing made by Canadian and British manufacturers within the next few days. Yet it is only a few years since tobacco-growing in Canada was practically limited to a few farmers raising it for personal use or for a limited local market. Now approximately 30,000 acres of the best soil in Southern Ontario are almost exclusively devoted to the growing of tobacco leaf in a scientific way, this year a crop amounting to 25,000,000 pounds, and having a selling-value \$8,000,000 in excess of the crop return of 1934. The finest cigarettes and other tobacco products in Canada incorporate Canadian tobacco in large and increasing quantities, and where, hitherto, American and other tobaccos had been used, while the Canadian leaf also has an excellent market in Great Britain in competition with foreign leaf.

The Imperial Tobacco Company of Canada, Limited, which buys a great part of the Canadian crop, has had much to do with the great strides taken by the tobacco-growing districts because it has had a policy for years of trying to encourage domestic production. First, however, it was necessary to gradually teach growers what and how to grow in order to meet public tastes long accustomed to foreign leaf. The company, at its own expense, imported cultivation experts, brought in the necessary plants for experimentation, made its own chemical and other researches of the soil, of moisture, and other conditions contributory to the best grades of tobacco, taught the grower on his own land by introducing experimental plots, and in other ways interested him in improving and enlarging his crop for the uses of the domestic market. It also illustrated to him the precise processes by which the domestic market might be developed in a profitable way. This and the researches of government experts, combined largely to producing the present condition, and to the creation from a small and unmarketable crop, a large and marketable crop, valued at more than \$8,000,000 a year.

The official edict has gone forth that the new styles for the ultra fashionable gowns will not embrace any warp waist. There will, though, be a sting in the prices.

Reform In Examinations

President Of University Of Alberta Would Make Entrance Less Rigid

Entrance examinations to the University of Alberta will be in the process of being made less rigid and formal, Dr. R. C. Wallace, president of the university, told 200 southern Alberta high school teachers in an address. He called the final examinations "the bugbear of Alberta teachers."

Reform in examinations would be directed towards leaving the teachers free to express themselves individually and then giving some fundamental, broad test to students matriculating from high school to university, Dr. Wallace said.

"We are trying to achieve the aim at the university that every examination paper set shall have one or two questions which cannot possibly be answered by memorizing notes," he continued.

The university president read as an example of the type of examination he was proposing a set of four examinations presented by Alberta University authorities to determine a scholarship winner last year. They included general examinations to test knowledge in the fields of English, history, science and mathematics, having none of the formal type of examination question.

Expression of the teachers' personality must be made easier, Dr. Wallace declared, and lessening of the strict examination rules would be the most effective method of accomplishing this end.

All types of political and social theories should be taught in school, Dr. Wallace asserted, but teachers should keep their own personal bias on such subjects in the background.

Grows Rice For Export

Australia Has Developed New Industry In Ten Years

Australia, which ten years ago imported nearly all of the rice consumed throughout the Commonwealth, is now producing not only enough for home consumption, but has a surplus for export. The 1934-35 rice crop of New South Wales yielded 35,000 tons of paddy rice, not including that retained for seed, according to the Agricultural Department of the Canadian National Railways.

Stone Mountain is a massive dome of muscovite granite in De Kalb county, Georgia, and is said to be the largest in the world.

Cattle Exports To U.S.

117,000 Head Shipped From Canada For First Ten Months

Approximately 100,000 head of heavy cattle have been exported from Canada to United States in the first 10 months of this year. Figures to the end of October reveal 117,000 head have gone over and it is estimated that 17,000 were calves. U.S. tariff on live cattle is three cents a pound when the animal is over 700 pounds and 2½ cents when below that weight. So a 1,000-pound steer would meet a customs duty of \$33.

The year has witnessed an entire reversal in the export trade in Canadian cattle. Last year nearly all Canadian cattle exports for the first 10 months went to the United Kingdom. The total shipments were 46,500. For the corresponding period this year they were 6,500 whereas the shipments to United States jumped from 4,700 cattle and calves last year to 117,000 this year.

The reason for the shift was the shortage of beef cattle in the United States and relatively lower prices in United Kingdom market.

Would Conserve Game Birds

Visitor To Alberta Advocates Hunting With Hawks

Alberta offers an ideal place for the ancient and honorable art of falconry—the hunting of game birds with hawks—according to Capt. Luff Meredith, of New York.

First man to fly falcons in Alberta, Capt. Meredith was in Calgary after a visit to the Rosebud district, where he flew five birds—one an Alberta goshawk. He did not hunt game birds with his hawks, but flew them loose after pigeons.

"The falconer advocates his chosen sport as a means of conserving game birds, at the same time aiding in the extermination of birds of prey such as crows and magpies.

"I believe the sport would be a great conservator of game birds in the west," he declared. "Unlike shooting, an entire party can share in the thrills of hawking."

If hawks were used generally instead of guns, the death rate among game birds would be cut to about one-tenth, he said.

Must Be The Climate

A report from Fort Erie, Ont., of a lemon nine inches in circumference growing on a plant in a home there is a "small potato story." Mrs. J. D. Gillock of Calgary, claims. She said she has a lemon tree that last year produced a lemon 17½ inches in circumference from which she made two pies and two glasses of lemonade. At present there is on the tree a green lemon, still growing, which measures 11½ inches in circumference.

A United States government scientist has advanced a theory that explosions in city sewers are caused, not by sewer gas, but by exhaust gas from automobiles, which is heavy and sinks into sewers.

John Timko of New Toronto went to work at a factory with a clear conscience recently—he paid back \$12.40 relief money he received in 1934 when he was sick and out of work. Relief officials said it was the first case of its kind in the history of the town.

London's Debt To Thames

City Is In Real Sense Founded On Ships

Its growth into the largest city of the country and of the world is owed by London to many historical accidents and to one very important fact—its geographical position. The seat of government might have been elsewhere and London might have had to share its political ascendancy with Winchester or New York. But it was almost inevitable that a large trading community should be established around the lowest bridge on the Thames, which flows into the narrow seas heading to the Continent and to the world. "The Thames is the root cause for London's existence, and the city is in a very real sense founded upon ships.—P.L.A. Monthly.

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons—instead of their doctors—on remedies for their children. If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia" doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia"—the safe remedy for your child. Remember this—And Always Say "Phillips' When You Buy." Your child deserves it; for your own peace of mind, see that you get it—Genuine Phillips' Milk of Magnesia.

Also in Tablet Form: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches, or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin".

We say this because, before the discovery of "Aspirin", most so-called "pain" remedies were advised against by physicians as being bad for the stomach, or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that in medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and all common pains... and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

Eliminates Static

Boon For Radio Fans Is Seen In New Demonstration

Radio reception free from static even during thunder storms so severe that sparks leap from the antenna wire is the offering of Major Edwin H. Armstrong, professor of electrical engineering at Columbia University.

He demonstrated the new system before the Institute of Radio Engineers in New York. He described the effect as the same as sending one stream of traffic—the static—through an underpass while the desired signals went across the bridge. He said the secret lay in frequency modulation instead of amplification modulation, the prevailing system.

About 20 per cent. of the students preparing for the medical and dental professions in Germany are now women.

Mothers Aided by Guide to Better Control of Colds

Practical Plan Is Helping Families Everywhere to Have Fewer, Milder and Shorter Colds.

SIMPLE AND EASY TO FOLLOW

Already, thousands of Canadian mothers are benefitting by following Vicks Plan for Better Control of Colds—proving for themselves that it is a practical home guide to fewer and shorter colds.

This commonsense, medically sound Plan represents the 30 years' experience of Vicks Chemists in studying colds. It has been tested in extensive clinics by practicing physicians—further proved in everyday home use throughout the country.

Here, briefly, are the three simple steps in Vicks Plan:

1. To Help Build Resistance to Colds Live normally—avoid excesses. Eat simple food and keep elimination regular. Drink plenty of water. Take some exercise daily—outdoors preferably. Get plenty of rest and sleep.

2. To Help Prevent Many Colds At the first warning nasal irritation, sniffle or sneeze, use Vicks Va-tro-nol—just a few drops up each nostril. Va-tro-nol is especially designed for the nose and upper throat—where more colds start. Used in time, Va-tro-nol helps to prevent many colds—and to throw off head colds in the early stages.

3. To Help End a Cold Sooner If a cold has developed, or strikes without warning, rub throat and chest at bedtime with Vicks VapoRub. VapoRub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster; (2) By inhalation of its penetrating medicated vapors, direct to the lungs. This combined, vaporizing action loosens phlegm, soothes irritation, helps break congestion. What Vicks Plan can do for you and your family can be proved only by trying it. Directions for following the Plan come in each package of Vicks Va-tro-nol and Vicks VapoRub.

MISS ALADDIN

"One Wide River To Cross"
"The Unknown Port", Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of 18, with no care beyond the choices of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could afford for the relief of the others to let them have.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adams, and Nancy go to the prairie home of Matthews' uncle for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the swirling snow they collide with a bus full of school children, which was stalled across the road with its back wheels resting in a snow-filled gully. Their car being wrecked, Jack and Nancy stay with the children and do all they can to help. The next morning Jack sets out for help in the blizzard. He succeeds in finding help, and the party of children and Nancy are rescued. As a result of the exposure Nancy's feet are badly frozen and Jack is seriously ill with pneumonia, but both of them recover.

Now Go On With The Story

CHAPTER XXIII—Continued

Nancy started, smiling as she recognized the wife of the health-seeker on the back road, one of the library's most faithful visitors.

"Come in," she welcomed. "I'm leaving day after to-morrow and am glad of this chance to say good-bye." The woman said, as she sat down in the cushioned chair: "That's why I came. I meant to stop at Miss Nelson's, but when I saw these open windows I knew you'd be here. I want to thank you for what you've done for—well, for every one in Pine Ridge, Miss Aladdin." She glanced up, her worn face lighted by a smile, while Nancy realized that something of a shock that this faded woman was quite young, probably not ten years older than herself. "Do you mind my saying, Miss Aladdin?" she questioned a bit shyly. "Sometimes I've wondered if that's what you are—a sort of magician who has worked miracles."

Nancy laughed, flushing a little too.

"It wasn't a miracle at all, if you mean this library. It was only common sense and a bit of elbow grease!" "No," answered her caller wisely, "it was more than that. It was thinking how you could make life happier for other folks." "I made all the difference between cold and home, to us!" she added. "My husband's better now, really better; and it's due to nothing in the world but having good books to read—something to take his mind away from himself and all our worries. Is it any wonder we think of you as Miss Aladdin?"

When she was gone Nancy sat there feeling strangely humble, a lump in her throat that threatened to grow bigger.

"I ought to have gone to see those people," she said regretfully. "I'll ask Matt to drop in on them some day. Why, the first time that woman came for books I thought she was older than Aunt Judy! Oh, why does life hurt some of us so cruelly?"

Rising with reluctance, Nancy closed the windows. This was her last visit to the library, for to-morrow she must give to Cousin Columbine. The girl stood for a moment looking off at the mountain; and suddenly she longed to visit it once again from the hilltop under the old pine.

"I'll sneak up back of the houses," she planned, locking the door. "If Jack sees me he'll want to go along, and somehow I'd rather be alone. I can stay a half hour and get back before the Adams send for us. If I do hope Matt will have cheered up by

evening. I just can't stand the way his eyes look."

By skirting the village it was possible to gain the hilltop unobserved, but it was a steep ascent, and Nancy was breathless when, emerging from the woods, she started toward the ancient landmark. Then, as an animal will stop when suddenly alarmed, the girl stood still. Some one was there, half hidden by the gigantic tree-trunk. How disappointing! Her tryst on this wonderful spot must be foregone. She venturing one cautious backward step, but a twig snapped under her foot, and the intruder, almost as startled as herself, turned quickly.

"Oh!" exclaimed Nancy. Her heart was thudding. "I didn't dream—I mean, Matt—I thought..."

She paused, for Matthew had sprung up, an unsmiling Matthew, as he came toward her: "Is it you, Nancy, or—or am I dreaming? No, I'm not crazy!" (He smiled a little.) "But I've been lying here for an hour or more wishing I had the power of Aladdin, so I could rub my lamp and—make you appear before me—just like this—is—is it really you?"

Nancy thought, her mouth curving in a smile: "What other fellow in the world would say a thing like that?" Then with a sudden impulse she stretch out both hands.

"Touch me, and see!"

CHAPTER XXIV.

No use trying; it was simply impossible to sleep. Thus thought Nancy as she turned, and tossed, and thumped her unfeeling pillow. The night was weirdly bright, as most nights are in Colorado, and (perhaps because she knew where each one was), these furnishings of the tower room which seemed so depressing eight months before, were dimly visible: the fat infant embroidered on the "splasher"; the mineral specimen clock which never ticked; the deformed kittens painted in oils; General Grant, and Aurora's mammoth calendar.

"It's surely strange," murmured the girl, "how you get used to things. I don't see that awful embroidered baby any more, and I've grown quite fond of General Grant. It just doesn't seem possible that this is our last night in Colorado, and that to-morrow Jack and I'll be juggling along somewhere in Kansas. Why, the day we got here, when Cousin Columbine displayed this room so proudly, I thought I couldn't get away from it too soon; and now all I can think of is—suppose we hadn't come!"

About to ponder this awful possibility, Nancy turned again and saw that the door into her brother's room was open. Said Jack, in muffled, irritated tones: "What the dickens is the matter with you, Nancy? That old bed lets out a groan every time you move, and I'd say you've turned over every three minutes of the last hour. Why don't you go to sleep?"

"Too much to think about. I'm figuring out what would have happened if we hadn't come to Colorado."

"That's easy." Jack seated himself on the foot of the massive bed. "I'd be earning my car fares in a broker's office most likely; and you'd be dragging 'round Edgemore, plying yourself and running up the telephone bill by calling your long-distance boy friends every few hours, just to tell him, 'Honestly, sis, can you imagine living our whole lives without having known Cousin Columbine, or the Adams, or—or going through that blizzard and everything? Maybe you'll laugh, but I feel lots older than when we came.'"

But Nancy didn't laugh. She said, thoughtfully: "You seem older, Jack. And I..."

Her self-analysis went no further,

and after a moment the boy went on: "I'm mighty glad old Matt's got back into his stride. All this last week he's looked like a lost dog, and I don't believe he's seen a lot of girls, and was sort of scared for fear he'd taken you too—well—seriously. 'Matt's' got a dandy fellow, Nancy. I'd hate to think he'd fallen for you too hard."

"So I'm not good enough for Matthew Adams?"

Uses Homing Pigeons

School Teacher Finds Them Handy For Sending Messages Home

Each Sunday afternoon homing pigeons fly into the yard of Martin Tucker of Wakefield, Mass., bringing the glad tidings that his school teacher daughter, Gladys, arrived safely in South Hampton, N.H.

Miss Tucker, who spends every week-end with her family found the telephone too expensive and the mails too slow. Homing pigeons, long a hobby of her father, solved the problem.

The pigeons return to the Tucker home in much less time than it takes for Miss Tucker to drive to South Hampton.

Many of the farmers of Eastern Canada who fed Western lambs during the 1934-35 winter under the Dominion Lamb Feeding Project are placing increased repeat orders, in many cases asking for double the number of lambs they fed a year ago. The applications, particularly from Quebec and Ontario, reflect the abundant supplies of hay, grain, silage, and other crops in Eastern Canada.

Cannot Be Answered

Food For Thought In Child's Question About Speed

The wisest sayings often come out of the mouths of children. A man motoring with his family in the country and discussing with his wife the present-day craze for speed and the disastrous results that so often follow excess of a reasonable rate of travel was interrupted by his little daughter's question:

"What is the speed limit?"

"Thirty-five miles an hour," he answered.

"Then why do they make cars that go faster?"

Ostriches are raised for meat in Russia.

Main Street

Soon be time for Christmas concerts.

Mrs. S. M. Brown arrived home from Hardisty on Tuesday, December 4th.

Mr. A. E. Foxwell spent a few days the first of this week in Edmonton on business.

Miss Agnes Seton of Edmonton attended the funeral of the late Mr. Watkinson in Irma on December 3.

The Irma public school have chosen Monday evening, December 23rd, as the date for their Christmas concert.

The annual meeting of the Irma ladies' aid will be held in the church next Thursday afternoon, December 12th. Mrs. Shaw will have charge of devotionals and hostesses are Mrs. E. Simmons and Mrs. R. Simmerman. There will be full reports from all departments, followed by election of officers for 1936. All members and friends are especially urged to make a real effort to be present.

A charity-vari party was staged by friends of Mr. and Mrs. A. Bacon at their home on Tuesday evening, Nov. 26th. The happy couple were presented with many lovely and useful gifts, after which lunch was served and dancing indulged in until the small hours. Mrs. Thos. Sanders and sons very kindly supplied the music. All the members of the community join in wishing Mr. and Mrs. Bacon every happiness.

FOR SALE OR TRADE—Red Tamworth boar, 16 months old. — H. H. Santee, Fabyan, Alta. 6p

OBITUARY

F. W. WATKINSON

Immediately after the interment of the late Mrs. McCreadie on December 3rd, the funeral service for the late Frederick W. Watkinson was held in the Irma United church. Rev. E. F. Kemp officiated at this service also.

Mr. Watkinson has been confined to his home during the past month with what proved to be a fatal illness, as he passed away peacefully on Sunday morning, December 1st.

The deceased was born in Hull, England, on March 31, 1862. In the fall of 1906 he and his wife came to Edmonton and the following spring moved down to Irma and began homesteading. After living on the homestead a few years he moved into Irma where he built a residence and has resided ever since until his death.

Mr. Watkinson was well thought of by all who knew him and will be greatly missed by a wide circle of friends. He leaves to mourn a loving and devoted wife.

The funeral was largely attended, the Irma L. O. L. of which the deceased was a charter member and the Irma L. O. B. A. attended in a body and performed their last rites at the graveside. Interment took place in the Irma cemetery.

The beautiful floral tokens were contributed by the following: Your loving wife, Agnes Seton, Norma and Charles; Irma L. O. L. No. 2066; Irma L.O.B.A. No. 924; Lila and Hartvig; Mr. and Mrs. H. W. Love and Russell Love; Margery Ross and Anna; J. C. McFarland Co.; Mrs. I. C. Knudson and family; Dad and Jim Hedley; Mr. and Mrs. Pryce Jones; Mr. and Mrs. W. N. Erickson; and Mr. and Mrs. J. Fletcher.

The pall bearers were Messrs. M. K. McLeod, John Watson, J. Holt, M. D. Askin, W. Cole and James Jackson, all members of the local lodge.

OFF TO ENGLAND

(From the Viking News)

Jack McAtthey received word today to proceed to England in connection with enlistment in the Royal Air Force. Jack who took a course in aviation at Edmonton this summer made good headway and this fall applied for enlistment in the R.A.F. He will leave for the Old Country in a few days where further examinations and tests will be undergone and if these are passed satisfactorily the young men taken on the force will go into training. Jack is the son of Mr. and Mrs. Wm. McAtthey and has grown up in this community, where he attended high school and excelled in baseball, hockey and other sports. We all join in wishing him success.
